

Appendix
Specific Criteria for Cumulative Theses
in the PhD Program in Management (PMA)
- Award Regulations for Doctor's Degrees [PromO 2007 & 2017] -

On the basis of Art. 6, paragraph 2 of the Implementation Provisions for the Production and Publication of a Thesis at the University of St. Gallen of 10 December 2007 and Art. 33, paragraph 4 of the Award Regulations for Doctor's Degrees as of 7 November 2016 respectively, the Program Committee has stipulated the following criteria:

1. The cumulative theses must include an introductory part, which depicts the relationships between the different parts of the thesis. Furthermore, the introductory part provides an overall conclusion. The introductory part does not replace the part, which must be produced by the doctoral student on his/her own.
2. All constituent parts have to be specified with author name(s), title, abstract and publication outlet in the introductory part of the thesis.
3. Each constituent part can only be included in one cumulative thesis, even if two or more PhD candidates are coauthors.
4. With the exception of the introductory part, all constituent parts of the cumulative thesis must have been published either in conference proceedings, scientific journals, or respectively in the form of a working paper, or have to be presented at a scientific conference where submitted paper are subject to review.
5. The supervisor has to check the compliance with the depicted criteria 1-4 and document the compliance in her/his written assessment.

Program Committee of PhD Studies in Management (PMA), December 2017
